

Name :

Surname :

Journalism is a discipline of knowledge. Looking on the ABC principle that is Accuracy, Balance and Credibility, the profession journalism is maintained and balanced by journalist. Journalism as such, is a process of collecting, verifying, reporting and interpreting information of any event and people. Journalism, in fact, has a big importance which brings with it so many responsibilities.

One of the important roles that journalism plays is giving a voice to the voiceless people. It achieves that through the journalists who provide information, and act as the voice of the voiceless. They, also, bring the matter in highlight that is to be prioritized, and does justice with them by letting the world know about the happenings. Another importance of journalism is that it plays a role of mediator between concerned authorities and public. The journalists help in exchanging idea of one another party. It acts as the bridge of concern authorities and public.

In addition, Journalism is a place where everyone has the equal right to share their views and opinions of their own and publish newspapers. And, it is also the pillar of democracy. It has operated in the state as the fourth organ and makes those operated happenings as a stack of history.
