ENGLISH EXAMAct 1: (4pts)

Social networking sites are websites designed for human interaction, enabling users to meet each other, share experiences, feelings and opinions.

In social networking sites, the user creates content for his/her friends and accesses the content they have created. This content can include pictures, videos, interesting links latest news, opinions, comments and much other information.

- 1- Supply punctuation and capitals where necessary in the passage. (01,5)
- 2- Identify parts of speech of the underlined sentence: (01,5)
- 3- Turn the following sentence into the passive voice: (01)

- Videoconferencing programs enable users to talk to and see each other.

- Users are enabled to talk to and see each other by videoconferencing.

Act 2: Complete the following chart: (4pts)

Words	Definitions
Analog Computers	An analog computers can perform several mathematical processes simultaneously. It uses continuous variables for mathematical operations. (01)
Hyperlink (01)	is a programmed connection from web site to another. It usually appears on a web site as a highlighted or underlined word or phrase.
Control Unit	It's a unit of a microprocessor. It's used to interpret instructions, relays commands to the digital logic unit and regulates the flow of data. (01)
Java (01)	It's one of the high-level languages. It's developed from C and C++.

Act 3: Compare between the following words: (2pts)

1-Desktop Computer Versus laptop.

2-Compiler Versus assembler.

- Compiler translates high-level language to assembly language. - Assembler translates the assembly language to machine language. (01)

- Desktop computers

- It is used in single position

- lower costs

- It runs on electrical charge

- Its devices are separated.

- laptop (01)

- It can be carried/mobile

- more expensive in cost.

- It runs on battery

- It is enabled with

an inbuilt keyboard

touch pad acting as

a mouse.

DON'T WRITE HERE

Act 4: Are these statements True or False. Correct the wrong ones. (5pts)

1) Machine languages consist of every day expressions, symbols, and numerals. F

It is composed of numbers (binary code (0,1)) (01)

2) Touch pad is a rectangular, touch-sensitive area in front of the keyboard on a laptop or netbook computer.

T (01)

3) A microprocessor consists of twelve transistors. F

It consists of thousands, even millions of transistors. (01)

4) Quantum physics, mechanics, weather forecasting, molecular theory are best studied by Personal Digital Assistants. F (01)

Quantum physics, mechanics, weather forecasting, molecular theory are best studied by supercomputers.

5) MySQL is one of an operating system software. F

- My SQL is one of an application software. (01)

Act 5: Fill in the blanks with only FIVE appropriate words: (5pts)

a- Military    b-Off    c- Stylus    d-Modeling

e-Technology    f-Worn    g- Apple's iPad    h- Wearable

A record-setting step in the evolution of computers was the creation of wearable (01) computers. These computers can be worn (01) on the body and are often used in the study of behavior modeling (01) and human health. Military (01) and health professionals have incorporated these computers into their daily routine, as a part of such studies. When the users' hands and sensory organs are engaged in other activities, those computers are of great help in tracking human actions. They do not have to be turned on and off (01) and remain in operation without user intervention.

GOOD LUCK
